

THREE MORE CLASSES
HAVE BEEN FINISHED
IN HOME-NURSING

Three more classes in home-nursing have been completed in the area served by the West Coffee Chapter of the American Red Cross, according to announcement made last week by Mrs. E. G. Bragg, chairman of the home-nursing program.

The Chestnut Grove class had 12 members to finish the courses on July 28; Victoria class finished on July 28 with 12 members; and Basin class with 13 members completed its work on July 18.

Two other classes, one at New Hope and one at Mt. Zion, will complete their courses within the next few days. Mrs. Ann P. Martin, registered nurse, is the efficient teacher for all classes in the county and according to reports from the communities, the ladies are highly pleased with the fine instruction she has been giving. They are also grateful to Mrs. E. G. Bragg who has spent much time in organization work for the classes.

Friends will be glad to learn that Pfc. Julian D. Bryant is in the Oliver General Hospital in Augusta, Ga. He was a patient for the past eight months in the 42nd General Hospital in Tokyo, Japan. He is awaiting discharge and check-up and expects to be home soon.

Lt. James R. Martin arrived Tuesday to be with Mrs. Martin and other relatives. He returned to the States about two weeks ago from his assignment in Japan and has already received his discharge. Friends are glad to welcome him home.

Friends and relatives of Mrs. Carey D. Harris will regret to learn that she has been serving at Ed Edge hospital, Troy, but is better, and friends wish for her an early recovery.

CONGRESSMAN ANDREWS
SAYS CPA URGING MORE
NAILS AND BALE TIES

Washington, D. C., July 29.—The Civilian Production Administration is pressing manufacturers of bale ties and nails, items urgently needed by peanut farmers for the harvest season, to expedite production, Congressman George Andrews says he has been informed.

Congressman Andrews said that Charles E. Brannan, Assistant Secretary of Agriculture, told him the Agricultural Department together with the Civilian Production Administration had developed a program to speed the shipment of bale ties and nails, and other agricultural equipment needed for the peanut harvest, to the farmers. Manufacturers who normally produce nails for post-growing areas have been urged by the Civilian Production Administration to increase tonnage in the sizes needed for August shipment.

The Civilian Production Administration reports a considerable improvement in the production of nails and nails, and other agricultural equipment needed for the peanut harvest, to the farmers. Manufacturers who normally produce nails for post-growing areas have been urged by the Civilian Production Administration to increase tonnage in the sizes needed for August shipment.

Mr. and Mrs. W. F. Fortner left Sunday for Detroit, Mich., where Mrs. Fortner will visit her brother and family while Mr. Fortner is attending the National Convention of Spanish-American War Veterans in Milwaukee, Wis.

Miss Winnie Bowdoin, of Montgomery, spent the week end with relatives in Elba.

Soil Conservation
Over Coffee County

By G. L. Edwards,
Soil Conservationist

Sixty-six cooperators of the local unit of the Wiregrass Soil Conservation District have made application for 61,800 pounds of blue lupine seed, 16,200 pounds of Austrian winter peas, 320 tons of superphosphate, and 80 tons of basic slag. These seed and fertilizer will be used to carry out their cover crop and pasture program as outlined in their farm plans. All farmers are urged to apply for any of these materials they may need, so the local dealer can get them in stock.

Both Austrian winter peas and blue lupine have a place in our winter cover crop program, but the purpose for which they should be used is not the same. Peas will not make a good growth unless planted early, on good soil, and liberally fertilized. They are not recommended for light soils, and they usually do not make sufficient growth for early turning as a soil improving crop in the fall of February. In other words, lupine is the winter legume for soil improvement in Coffee County.

Some of the farmers in Basin community who plan to plant cover crops this fall are: Roy W. Barlow, 30 acres of lupine and 20 acres of A. W. peas; J. C. Parris, 8 acres lupine; F. C. Mook, 24 acres lupine; F. E. Mook, 24 acres lupine; W. T. Moore, 16 acres lupine; Orel Parker, 40 acres lupine; and E. L. Eiland, 28 acres lupine. Some of these farmers are trying lupine for the first time, while others have grown it to turn under green, or harvested for seed.

Once a few of the District co-operators in the Enterprise area have applied for seed and fertilizer. Those who have made their plans are: J. W. Armour, 12 acres of lupine; W. R. Armour, 20 acres lupine and 30 acres A. W. peas; D. D. Byrd, 30 acres lupine; S. W. Crumpler, 8 acres lupine and 9 acres peas; L. W. Hickman, 40 acres lupine; and J. B. Martin, 30 acres peas.

Plant Growth
A corn plant uses about 368 pounds of water to produce one pound of dry matter, while cucumbers use 718 pounds of water and pumpkins 854 pounds of water to make one pound of dry matter.

Mr. and Mrs. Fred Griffin, of Lake Worth, Fla., were guests of Mrs. G. M. Prescott, and other relatives here last week.

Mr. and Mrs. John Johnson, of Dothan, Mr. and Mrs. J. A. Johnson, of Curtis, were guests Sunday of Mr. and Mrs. Fred Johnson.

ALABAMA BANKS ARE
IN STRONG POSITION;
ASSETS MAKE BIG GAINS

Montgomery, Ala. — Alabama banks are in a strong position to meet whatever problems the post-war era may present, according to Miss Addie Lee Farish, Director of the State Department of Commerce.

A statement of condition of the 153 State banks and one branch bank at close of business June 29, 1946, showed total assets of \$420,406,726, a gain of more than \$58,000,000 in a year, the figure for June 30, 1945, having been \$361,972,819. Deposits relatives showed an increase of more than \$40,000,000 in the same period, from \$449,935,455 to \$397,629,652. Increased business activity, and the fact that banks are taking out of assets needs of their communities, was reflected in increase in loans and discounts to \$59,772,089 June 29, 1946, to \$70,242,466 on June 29, 1945.

Miss Betty Jean Jones, who is attending summer school in Montgomery, spent this week end with her parents, Mr. and Mrs. A. G. Jones, in Elba.

Mr. and Mrs. William Martin, of Auburn, were guests of Elba residents during the past week.

Mr. and Mrs. W. F. Fortner left Sunday for Detroit, Mich., where Mrs. Fortner will visit her brother and family while Mr. Fortner is attending the National Convention of Spanish-American War Veterans in Milwaukee, Wis.

Miss Winnie Bowdoin, of Montgomery, spent the week end with relatives in Elba.

Photographs of Mars have been done with the great Lick refractor in planetary observations. At the last close approach of Mars 22 drawings of the planet and about 1,500 photographs were obtained, many of these with the aid of specially dyed plates. These are of great value in interpreting the nature of the changes that are continually taking place on the surface of the planet.

Soil Conservation Over Coffee County

By G. L. Edwards, Soil Conservationist

The five acres of kudzu on the farm of J. G. Young, of Curtis community, which was planted this spring, is proof that a good stand of kudzu can be obtained by proper land preparation and setting of crowns. Mr. Young prepared the soil and set the crowns wide at intervals of 20 feet and applied phosphate at the rate of 100 pounds per acre. After the 100 pounds of crowns were set about 3 1/2 feet apart on the beds. Almost 100% of the crowns survived and many of the plants have runners over 10 feet long. The amount of growth has been so encouraging, but it must be remembered that it was planted on very poor, eroded, sandy soil where row crops could not be grown profitably.

Crotalaria that was planted in the drill in alternate rows with corn is beginning to make good growth on Wilbur Donaldson's farm near Curtis. This is one crop that does not make much growth until the corn matures, but after the corn gets competing with the crotalaria for fertilizer and moisture, a healthy growth is made that produces enough cover to aid

in prevention of erosion, and add plenty of organic matter and nitrogen to the soil when turned.

Only five Coffee County farmers produced a surplus of lupine seed this year. C. B. Williams, Kinston; John B. Johnson, Curtis; Orell Parker and F. E. Meek, Basin; and A. L. Masters, Enterprise, but this will be the first time any of our farmers will have seed for sale. Approximately 100,000 pounds of lupine seed have been earned and sacked to sell to other farmers in the county this year.

The main cash crop in Coffee County is lupine seed. This means that approximately \$32,000 will leave Coffee County for lupine seed. Why can't we keep more of this money at home?

Plans now available at COUNTY AGENT'S OFFICE FOR NEW FARM HOMES

Plans are now available through the County Agent or Home Demonstration Agent's office at Enterprise for 27 different type farm homes. Farm people interested may see a sample of these plans

at the local Extension Service Agent's office. These include floor plans, elevation drawings and detail sketches necessary to the building of a home from a three-room size to eight rooms. No charge is made to residents of Alabama for these plans. Plans for financing home building are not handled through the Extension Service.

Materials for building are scarce and expensive but the matter of deciding on type and size of the new home should be worked out in advance. In addition to homes, plans are available for barns, poultry houses, dairy buildings, machine sheds and other farm buildings.

"Used to Weigh 170 lbs."

Mr. D. M. Hawkins, Texas, now weighs 170 lbs. a few weeks ago he weighed 250 lbs. He took to bed for 10 days. He is now eating 100 lbs. of food a day. He is now eating 100 lbs. of food a day. He is now eating 100 lbs. of food a day.

We Are Now Ready With Ample Facilities To Give You Prompt and Efficient Service and Pay You Top Prices for Your 1946 Crop of Peanuts

QUALITY PEANUTS ALWAYS BRING THE BEST PRICE. THIS IS TRUE, THIS YEAR, MORE SO THAN EVER, AS CAN READILY BE SEEN BY STUDYING THE COMPARISON OF PRICES—SCHEDULE BELOW.

Experience in stacking of peanuts teaches us that the vines should be allowed to wilt good before stacking and that the cross bars should be high enough from the ground to allow free passage of air under these stacks.

It has also been proven that capping the stacks with grass or peanuts has been a big help in holding down concealed damage in peanuts.

WINDROWING AND SHOCKING IS RISKY
AS
THE ODDS ARE TOO MUCH AGAINST YOU—AND YOU HAVE TOO MUCH AT STAKE

WE ARE ALWAYS INTERESTED IN SEEING THE FARMER GET THE BEST RETURNS FROM HIS PEANUT CROP. TO THIS END WE HAVE DONE OUR PART IN PROMOTING:

1. The planting of treated seed to insure better stands and of course higher yields.
2. Dusting with sulphur for control of leaf-spot and to repel insect damage for better quality and bigger yield.
3. Poisoning with Cryolite to insure against worm infestation, saving the hay and assuring a yield.

NOW

STILL PULLING FOR YOU AND EXTREMELY ANXIOUS TO SEE YOU GET THE MOST DOLLARS POSSIBLE OUT OF YOUR 1946 CROP.

WE ADVOCATE AND STRESS DILIGENCE IN STACKING AND CURING, AND URGE THAT YOU USE EVERY MEANS WITHIN YOUR POWER TO HARVEST AND MARKET THIS CROP WITH LITTLE OR NO DAMAGE.

IT MEANS MORE DOLLARS IN YOUR POCKET.

BRING US YOUR PEANUTS

We Are In the Market Twelve Months In the Year

Compare 1946 Peanut Prices Against 1945 Peanut Prices

141.60	154.00	131.60	117.30	62	138.40	149.80	128.40
139.30	151.50	129.30	115.60	61	136.20	147.40	126.20
137.00	149.00	127.00	113.90	60	134.00	145.00	124.00

* These prices do not include shrivels. Each 1% of shrivels should add \$1.70 to these prices as explained hereunder.

All 1946 prices are based on \$174.00 for Spanish with 70% SMK.—and \$157.00 for Runners with 65% SMK. not exceeding 2% Damage. For each 1% Damage in excess of 2% and not exceeding 6% there is a deduction 1% of total meats, including shrivels.

Each farmer should be his own judge as to when to dust for leaf worms.

Tests seem to show that one dusting of Cryolite 15 days prior to digging time will control leaf worms satisfactorily.

We shall be glad to assist you any way we can with any of your peanut problems.

W. E. DANIELS PASSES
AFTER SHORT ILLNESS

Jack, Ala., July 31.—Funeral services for W. E. Daniels, who died at his home Saturday following a short illness, were held Sunday at 3 p. m. at Friendship Church with burial in the church cemetery.

Surviving are his widow, three sons: Charles, Walter, Haven, Fla.; J. D. and C. Daniels, both of Jack; a daughter, Mrs. James Arnett, Tennesse; a brother, Love

Daniels; four sisters: Mrs. Roy Ward, Mrs. James Sonn, Mrs. Will Mauldin, all of Bradley, and Mrs. Tom Sonn, Troy. The Rev. Bennie Griswold officiated.

Donald Reddick, chief warden, U. S. Navy, of Charleston, S. C., spent the past week with his wife.

Mr. Roy E. McDowell returned to Elba Friday afternoon from a several-weeks visit to relatives in Miami and Monticello, Fla.

Modern Concrete Block
Plant in Dothan, Alabama

Brewton Engineering Co. Produces
Superior Light Weight Blocks and Bricks

In the present post war period when we are faced with an appalling lack of homes and a scarcity of lumber, brick, floor board, etc., the concrete block industry has stepped forward to fill a large void in the building industry.

In October of last year, upon completion of its contract of building brick houses, the plant laid to rest the old brick making machine and the new Superblock machine at the main ingredient for making concrete blocks at its Dothan, Alabama, plant.

WHAT IS SUPERBLOCK? Superblock is a lightweight, cellular slag, processed and refined and expanded while molten hot, it comes from the furnace. When used as an aggregate in the making of concrete units, it produces blocks having a ratio combination of strength, fire resistance, insulation, acoustical value, durability, lightness in weight, low absorption, non-sweating and low cost.

These characteristics give it distinctiveness as "THE MODERN BUILDING MATERIAL." Tests have demonstrated that concrete blocks made of this aggregate exceed minimum requirements of the American Concrete Institute and the American Society of Testing Materials. Spec. c90-44, Recent laboratory tests made on some blocks from the Brewton plant in months in average compressive strength of 1395 pounds per square inch.

Some of the characteristics of Superblock are as follows: (1) They are light in weight. A concrete unit 8x8x16 in. made of Superblock weighs approximately 16 lbs. and is 40 percent lighter than a similar unit made of such materials as sand, gravel, slag, etc. This uniform light weight has given the building industry a material which reduces the loads and labor, as well as increases speed and economy in erection of buildings.

(2) Superblock blocks are handled with a minimum of breakage.

Visitors are welcome and are invited to inspect the plant during the regular work hours.—(Adv.)

Two other Elbians, Louis J. Brooks and James W. Hussey, were also injured when the Brooks car and the Hussey car were in a head-on collision on the S. F. highway.

Highway patrolmen who investigated the wreck, stated that Brooks, who was driving the car in which Liebert was a passenger, attempted to make a left turn in front of Hussey's car which was approaching from the opposite direction. Both cars were badly damaged.

Mr. Brooks suffered a broken knee and many cuts and bruises. He was also rushed to the Enterprise hospital, but was removed to his home here Monday, where he is getting along nicely. Hussey suffered a knee and one elbow dislocation.

Funeral services for Mr. Liebert were held at the Bentley home on Davis Street Sunday afternoon at four o'clock, with Rev. Wm. M. Spivey officiating. Interment was in Evergreen cemetery.

Funeral services for Mrs. Liebert were held at the Bentley home on Davis Street Sunday afternoon at four o'clock, with Rev. Wm. M. Spivey officiating. Interment was in Evergreen cemetery.

GAP LIEBERT DIES
FROM WRECK INJURED;
TWO OTHERS INJURED

Gap Liebert, 42 years of age, well known here where he had lived for the past two years, being employed at the Dorsey Trailer plant, died early Saturday morning from injuries received in an automobile accident last Wednesday night. Mr. Liebert was rushed to Enterprise hospital soon after the accident and remained in an unconscious condition till his death. He suffered internal injuries and a possible skull fracture.

Two other Elbians, Louis J. Brooks and James W. Hussey, were also injured when the Brooks car and the Hussey car were in a head-on collision on the S. F. highway.

Highway patrolmen who investigated the wreck, stated that Brooks, who was driving the car in which Liebert was a passenger, attempted to make a left turn in front of Hussey's car which was approaching from the opposite direction. Both cars were badly damaged.

Mr. Brooks suffered a broken knee and many cuts and bruises. He was also rushed to the Enterprise hospital, but was removed to his home here Monday, where he is getting along nicely. Hussey suffered a knee and one elbow dislocation.

Funeral services for Mr. Liebert were held at the Bentley home on Davis Street Sunday afternoon at four o'clock, with Rev. Wm. M. Spivey officiating. Interment was in Evergreen cemetery.

Funeral services for Mrs. Liebert were held at the Bentley home on Davis Street Sunday afternoon at four o'clock, with Rev. Wm. M. Spivey officiating. Interment was in Evergreen cemetery.
